

Adheya Systems

Adheya Systems specializes in providing legal support services to fulfill the unique needs of personal injury law firms involved in pre-litigation or litigation discovery. Our Paralegals obtain all the documents necessary to support damages based on a personal injury claim.

Adheya's Services

Adheya has become the premier resource for information gathering and document-retrieval services. Our in-house Paralegals retrieve all medical records that pertain to a given case from all applicable providers. We first retrieve, then organize these documents for use in demand summaries by creating medical records and medical bills indexes. By employing effective methodologies with proven results, we have a faster and more efficient means of accessing and managing medical records data and other sensitive information online. As a result, you receive documents and summaries quicker and at a lower cost.

Technology combined with personalized service makes the difference

The entire discovery process is simplified to become faster, better, **HIPAA compliant** and more cost effective. Utilizing the latest technology, we offer you more flexibility for customization, user-friendly online access and the lowest cost per case. Here are a few of the many benefits of putting the size, experience and state-of-the art technology of Adheya on your team:

- Real-time online order status
- All Data on a HIPPA Compliant Network
- Quicker turnaround
- Online reporting tools that keep you well informed
- Imaged documents stored online for two years

Online Access to Client Data

You will have access to medical records from any web-connected computer. Records can be reviewed, searched, summarized, saved and printed from your web browser. The records are obtained from the providers, checked for completeness and accuracy, and then uploaded to our secure, HIPAA-compliant online Document Management Software (DMS) system.
